

## COVID 19 Health Screening Guidelines

Beginning May 26, all [REDACTED] staff and volunteers will have their health screened upon reporting to work. This includes the following:

### Self-Screening

You should not report to work if you are experiencing symptoms of COVID-19 or have experienced symptoms in the 72 hours prior to start of shift. Any symptoms should be communicated to your respective supervisor. People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. These symptoms may appear 2-14 days after exposure to the virus:

Fever of 100.4 or higher in preceding 48 hours?

Cough?

Shortness of breath or difficulty breathing?

Chills?

Repeated shaking with chills?

Muscle pain?

Headache?

Sore throat?

New loss of taste or smell?

Have you been in close contact with a confirmed case of COVID-19?

Any employee experiencing COVID-19 symptoms should contact their medical provider or call the COVID-19 hotline at [REDACTED].

**Pre-Work Screening** – Upon reporting to work, employees' body temperatures will be measured with a thermometer and assessed. Employees with body temperatures greater than 100.4°F or who have flu-like symptoms (e.g., cough, body aches) will not perform on-site work duties and will be directed to return to their homes. Employees will be asked if they are experiencing any symptoms from the above list. Any employee experiencing COVID-19 symptoms should contact their medical provider or call the COVID-19 hotline at [REDACTED].
